

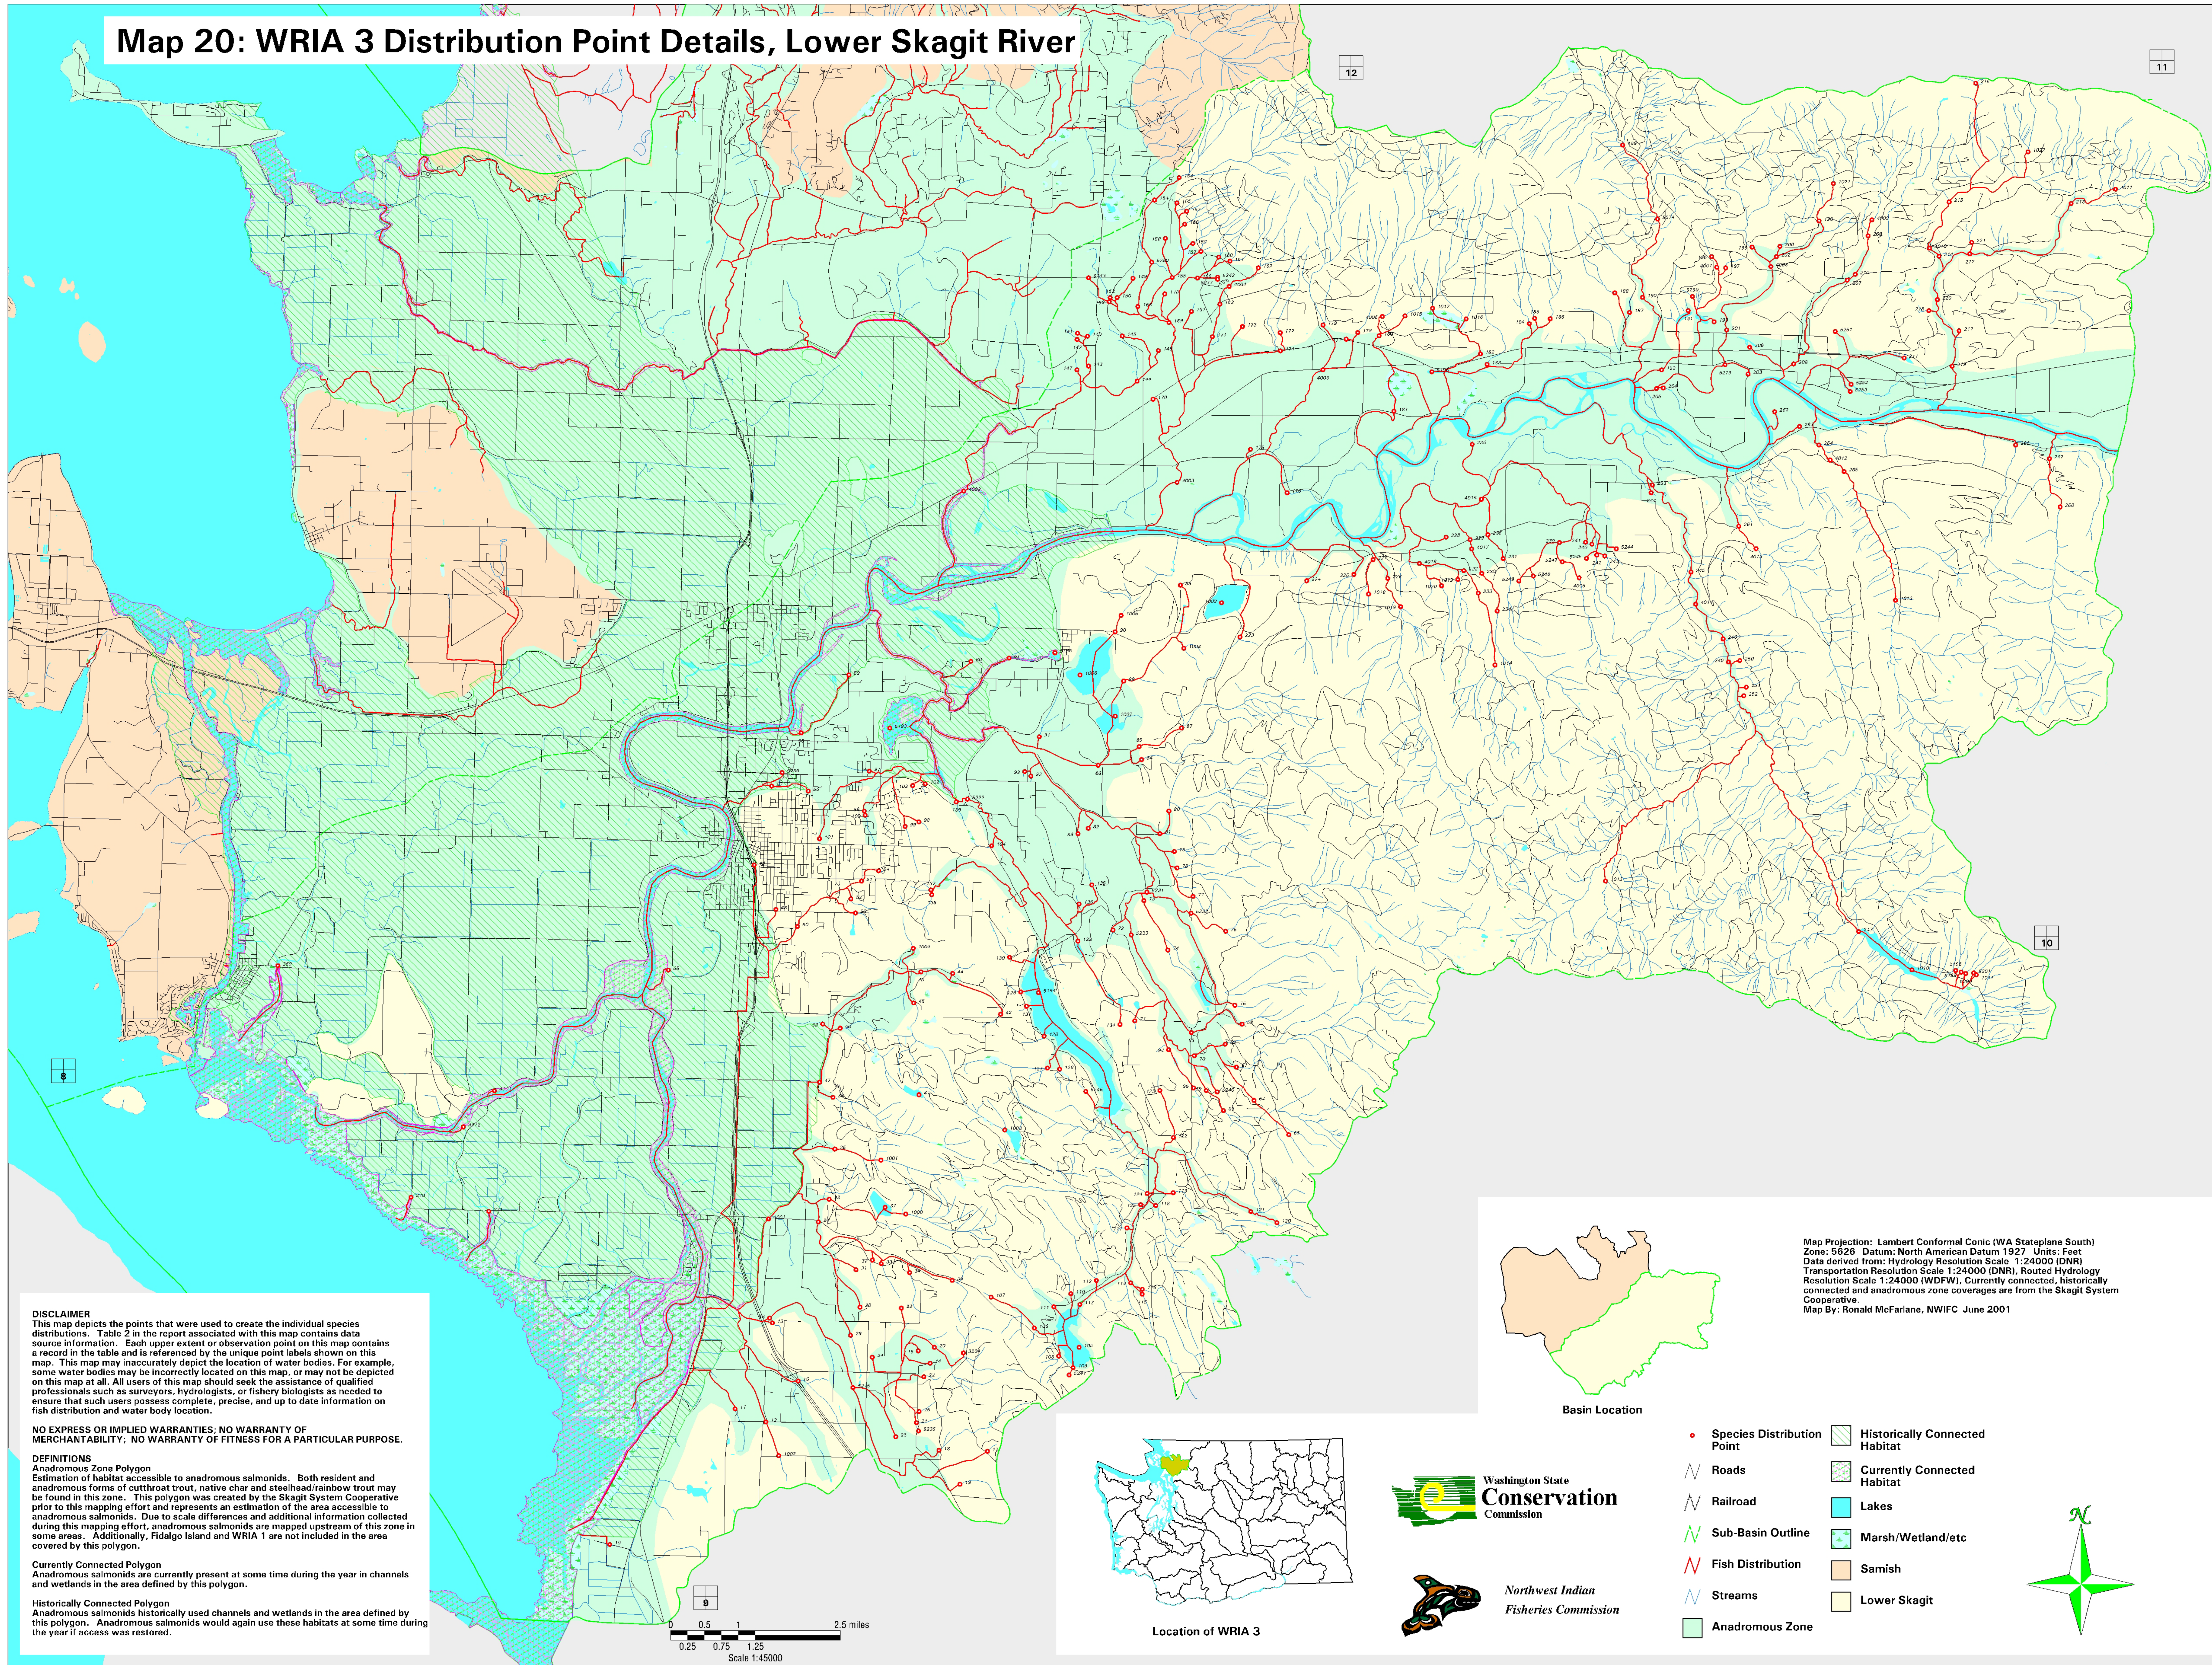

Map 20: WRIA 3 Distribution Point Details, Lower Skagit River

DISCLAIMER
This map depicts the points that were used to create the individual species distributions. Table 2 in the report associated with this map contains data source information. Each upper extent or observation point on this map contains a record in the table and is referenced by the unique point labels shown on this map. This map may inaccurately depict the location of water bodies. For example, some water bodies may be incorrectly located on this map, or may not be depicted on this map at all. All users of this map should seek the assistance of qualified professionals such as surveyors, hydrologists, or fishery biologists as needed to ensure that such users possess complete, precise, and up to date information on fish distribution and water body location.

DEFINITIONS
Anadromous Zone Polygon
Estimation of habitat accessible to anadromous salmonids. Both resident and anadromous forms of cutthroat trout, native char and steelhead/rainbow trout may be found in this zone. This polygon was created by the Skagit System Cooperative prior to this mapping effort and represents an estimation of the area accessible to anadromous salmonids. Due to scale differences and additional information collected during this mapping effort, anadromous salmonids are mapped upstream of this zone in some areas. Additionally, Fidalgo Island and WRIA 1 are not included in the area covered by this polygon.

Currently Connected Polygon
Anadromous salmonids are currently present at some time during the year in channels and wetlands in the area defined by this polygon.

Historically Connected Polygon
Anadromous salmonids historically used channels and wetlands in the area defined by this polygon. Anadromous salmonids would again use these habitats at some time during the year if access was restored.

Map Projection: Lambert Conformal Conic (WA Stateplane South)
Zone: 5626 Datum: North American Datum 1927 Units: Feet
Data derived from: Hydrology Resolution Scale 1:24000 (DNR)
Transportation Resolution Scale 1:24000 (DNR), Routed Hydrology
Resolution Scale 1:24000 (WDFW), Currently connected, historically
connected and anadromous zone coverages are from the Skagit System
Cooperative.
